

THE EMPRESS EXPRESS

VOLUME XVIII. No. 3

EMPRESS, ALTA. THURSDAY, June 19, 1930

Price: \$2.00 Per Year.

United Church

Church School, 10:30 a.m.
Public Worship, 11:30 a.m.
U.F.A. Sunday will be observed.
Text: "Whosoever will be chief among you, let him be your servant."—Matt. 25:27.
Services will be held at:
Leland, 2:30 p.m.
Social Plains, 7:30 p.m.
"Ability will enable a man to get to the top but character is the only thing that will keep him from falling off."
We want to see you at Church, Sunday.
Rev. Geo. A. Shields,
Minister.

New Scheme To Aid Unemployed

Ottawa.—Efforts to stabilize employment on the year-around basis constitute a new economic trend that will help to take manufacturers into the rural and other new markets, according to prominent economic students here.

Year round employment is being discussed quite generally by outstanding commercial leaders today and in general the business leaders understand they have a heavy responsibility toward their workers in providing continuous employment. The practical result will be to make manufacturers interested in and all new markets, rural as well as metropolitan.

There were no Anglican church services at this point on Sunday.

Wm. Haines In "The Duke Steps Out"

The new picture is a limination of the Saturday Evening Post story by Lucian Cary. Haines plays a prize fighter who enters college to please his sweetheart, and his trials and tribulations furnish hilarious comedy, while the fight furnishes thrills. His love affair with Joan Crawford supplies a pretty romance.

The cast includes Karl Dane, Tenen Holtz, Eddie Nugent, Delmer Davis, Luke Cosgrove, Herbert Prior and many others of note.

The fight scenes were staged at the Hollywood Legion Stadium, where the screen colony attends weekly fight events. Haines fights in the ring with Jack Roper, noted heavy weight championship fight contender. This picture is showing Friday and Saturday of next week.

Acadia Valley Lose To Bindloss Team

In the local baseball league, Acadia Valley lost to Bindloss, on the latter's grounds, on Wednesday. The score was 11-14.

Put on Five-Day Week

Chevrolet Motor and Fisher Body plants of Tarrytown, N.Y., have been placed on a five-day week schedule instead of six.

"That fellow's driving his car so carefully that I think he must be a new driver."
"No, he just paid cash for the car."

R. M. of Mantario No. 262

Minutes of meeting June 2, 1930. At Orange Hall, Cuthbert, 10 a.m. Present, Reeve Anstrum and a full Council.

Minutes of previous meeting read and confirmed on motion of Cn. Hawtin.

Treasurer's monthly statement accepted and filed on motion of Cn. Batty.

Committees—Anstrum and Dahl reported that repairs to r grader had been ordered, amounting to about \$250 and that everything would be ready for work in another day.

Montgomery—That report be accepted and committee continue till work is completed.

Accounts—The finance committee examined the accounts presented and the following found correct were passed for payment:

Alaskan hospital, 15.00; Empress hospital, Mitchell, 78.00; Estonia hospital, April, 75.00, May, 134.00; Anti tuberculosis League, 535.80; J. D. Adams, machinery mites, 20.15, 4.90; Western Man. News, 8.75; Man Carlo Tel. Co., 75; Empress Express statements, 40.00; Sect. Treas. postage, 14.90; C.N.R. freight, 1.80; Sack. Alta. Hardware, 1.35; A. Matthews, roads, Div. 1, m., 12.00; Sect. Treas., expenses, Kludersley, 10.00; Do. mission, 10.00; Empress Lumber Yards, cutters, Div. III, m., 2.35; Imperial Oil grader out, 16.05; Roads, Div. II, cap. relief road wk., 44.00; Roads, Div. VI, notice, ditto, 25.50. Total, 1059.10.

Kinch—That the following accounts for supervision of roads be paid:

C. Dahl, 34 days, grader repairs, 14.00; H. Anstrum, 34 days, ditto, 105 miles, 26.00; Montgomery, 6 days, 83 miles, 35.55.

Montgomery—Re St. Paul's hospital, account rendered. That one half of this account be paid.

Batty—That as no solicitor for the Municipality for 1929, the account for retaining fee be not paid.

Hawtin—That the Secretary purchase from the T. Eaton Co. two first aid kits.

Dahl—That tax certificates No. 649 A be assigned to Mrs. Alice Montgomery, \$0.10.

Hawtin—That application of Pool Elevator Co. for reduction of tax be disallowed.

Dahl—That the road committee go over the road S. of Alaska and decide on what and how the work is to be done before the work begins, that the

Alberta's Petroleum Production Doubled

Calgary—Alberta's 1,000,000 barrels of petroleum last year came from five fields, though Turner Valley was by far the greatest producer, with 951,221 barrels. Total output of the province was 990,182 barrels, says the Department of the Interior. Besides Turner Valley, the other fields were Wainwright field with 12,332 barrels; Hiltstone with 2830; Skiff field, 1432 barrels; and Red Conies with 1328.

Production in Alberta last year more than doubled 1928. Production figures for the last five years show output for 1928, as 105,943 barrels; 1929, 210,508 barrels; 1927, 332,133 barrels; 1928, 469,531 barrels, and 1929, 990,152 barrels.

Report of Cream Prices

For the week ending June 7, 1930, the following prices were reported paid by creameries per pound of butterfat, in several grades of cream, and at the points shown:

Ponoka Creamery, special grade, 27c-27c, No. 1, 27c-25c, No. 2, 24c-25c.
Minimum Special grade, 27c-25c, No. 1, 25c-24c, No. 2, 22c-21c.

Price of cream reduced 1c, June 5th.

foreman be instructed on some so that all mistakes will be avoided.

Road Grant 1931.—Montgomery. Not that I am against No. 44 road grant, but I would like the Dept. of Highways Grant for 1931, if any, to be put on the Empress-Estuary road, as there are outbanks to contend with at both places, that is off the river. It will take a good many years yet to finish No. 44 road and it would be giving the south end of the municipality a road. This will help Divs. 1, 2 and 3.

Dahl—That the Sect. have authority to pay the telephone account for May.

Dahl—That D. B. McPherson be appointed weed inspector in place of the late A. W. Anderson.

Hawtin—That Cn. Batty be deputy-reeve for the next three months ensuing.

Council adjourned at 7 p.m., to meet again at Orange Hall, on Monday, July 7th, at the usual hour.

C. Evans Sargent,
Sec. Treas.

Provincial Elections Today

Today is provincial election day, and there has not been a great amount of interest evinced previously. However, at the opening of the poll, voters were arriving to register their choice, and there was every evidence that a good representative poll would be cast locally.

The Baby In Summer

There are certain points which require attention during the warm weather in order to keep the baby healthy, to protect him from disease, and to make him comfortable. There are some conditions associated with hot weather which are apt to cause upsets and diseases in the infant.

During the hot weather, a bath morning and night, is desirable. If the day is very hot, a cool sponge in the middle of the day will help to keep baby comfortable.

The baby should be dressed according to the temperature, not to the time of the year. His clothing should be varied from day to day and from day to night as the temperature changes. On a really hot day, a diaper alone, or a diaper and a thin sleeveless shirt are sufficient clothing.

Feedings should, of course, be just as regular in summer as at other times. The baby may not gain in weight during the hot weather, and he may take a smaller amount at his feedings, but as long as he is well, this need not be a cause for worry.
Babies become thirsty and during the summer they will take a considerable amount of water. Unsweetened boiled water should be offered to the baby at least once between feedings.

The baby is much more cool and comfortable when he is not being handled. Leave him alone to rest and be quiet.

Keep all milk on ice so that it does not sour. Prepare all feedings exactly as ordered. Pasteurize all milk used.

On hot days, the baby should be kept in a shady spot and not exposed to the sun, except in the early morning or the late afternoon.

Locusts carry disease germs as well as being a nuisance. The baby himself and his food should always be protected against flies and other insects. Screen the house. Cover the

LIBERAL CONVENTION

A Liberal Convention will be held in the old I.O.O.F. Hall in Medicine Hat, at 3 p.m. on Saturday, June 21, 1930, to nominate a Candidate for the Federal Riding of Medicine Hat. Hon. Charles Stewart will address the Convention.

baby's crib and carriage with netting.

Summer diarrhoea is not nearly as common as it was a few years ago because of the better care which is now being given to babies. If it does occur, it should be dealt with at once. Stop all feedings; give as much unsweetened boiled water as the child will take, and place him under the doctor's care. Summer diarrhoea is a serious and often fatal condition unless properly and promptly treated.

If the baby is cared for in the manner indicated, there is no reason to dread the summer.

Pool Elevator At Loversna Struck by Lightning

On Saturday, June 7, the Pool elevator at Loversna, was destroyed by fire, which was caused by lightning striking the cupola. The building, together with office and engine house was a total loss.

Castle Coombe Mission

11 a.m., Wainfleet School, 2:30 p.m., Mayfield Hall, 3:15 p.m., Sunday School.

"Duchess" Salutes Bridge

There was a happy incident at the opening of the \$200,000 Montreal Harbor Bridge on Victoria Day when the Canadian Pacific "Duchess of Richmond," 25,000-ton giant under the command of Captain A. Freer, B.N.R., added the salute of her deep stern to the cheers of the thousands assembled. Just as Premier Mackenzie King was formally opening the bridge, the liner passed dramatically beneath it with multi-colored flags fluttering from bow to stern and her ensign dipping in the salute. She hailed the bridge with the stentorian "long, two short and long" blasts that herald arrival of Canadian Pacific ships. It is interesting to note that what is seen of the bridge contains the same weight of steel—20,000 tons—as there is in the ship.

The Farm For The Farm Boy?

Every once in a while some pulpit or philosopher comes along with a few suggestions on how to remedy the evils with which agriculture is supposed to be afflicted, and frequently winds up with a peroration containing some gratuitous advice to "keep the boy on the farm."

All of which might be all right if the itinerant sages were fully acquainted with the conditions of the country which he calmly surveys from the window, the conditions of the industry about which he descants so easily and freely, and the trend of the times, about which he may, or may not know anything. If, however, he was so well posted he would probably tell the newspaper reporter that he has "nothing to say on the subject today."

Now this question of "keeping the boy on the farm" is not a new one, and it has a good many answers to it, some of which are well worthy of a little reflection by the individual before he decides whether the boy should be kept on the farm, and if so, how to go about it.

The first question that naturally arises is: "Should the boy be kept on the farm?" This query opens a great realm of speculative thought and examination long before the sequel arises: "How is it to be done?" can be satisfactorily dealt with.

It can be said at the outset, without fear of contradiction, that not all boys are fitted for life on the farm, physically or temperamentally, despite the fact that the farm affords an outlet for the expenditure of a wide range of talents. To try and bind such youths down to a life with the soil is akin to shipping a consignment of flannel vests and fur coats to the natives of Equatorial Africa, and about as useful.

And what about agriculture itself? Does agriculture need, and can it offer suitable rewards and satisfaction to, all the boys who are born on the farms of Western Canada?

Here again is a question which has an important bearing on the problem of taking care of the future of the rural youth. Fifty years ago a single farmer could only raise enough produce to feed a handful of people. Today, with the use of highly mechanized and highly powered implements, one farmer can feed a host, and the trend in the direction of increasing the productive power of the individual in the realm of agriculture is neither recording a halt nor a swing in the other direction.

If science, combined with improved business management, is going to continue to widen the scope of the individual engaged in agricultural production, the time may come when a very considerable proportion of the lads reared on the land will have to look elsewhere for a vocation.

Ten, even more than today, the question of determining the fitness, or otherwise, of the rural boy for bringing forth the fruits of the earth, will assume a greater importance. As has happened in other industries in the flux of time and change, those best adapted by nature and preparation to agriculture will be those who will stay with the industry, and they only. The others will find other fields more suited to their talents and inclinations.

If the foregoing diagnosis of the trend of the times is correct, it is very fortunate that the Western Canadian provinces have within their borders an infinite variety of resources awaiting the application of the initiative and courage bred in our youths, for their recovery and conversion to the services of mankind.

It is also fortunate that coincident with this tendency to reduce the man power on the farm, a marked development is taking place in industrial life in the west which, along with the development of the resources already referred to, will afford an ever widening outlet for the energies of young manhood.

Progress has always been marked by evolutionary changes of this kind. Usually they bring discomfort to some, but this is inevitable. It is useless to try to stem the forward march. The wise attitude is to try and discern what present day trends may bring in the future and take advantage of the opportunities that may arise.

These are questions which, no doubt, are receiving serious consideration by those responsible for the conduct of education in rural districts. The wise educationist is not content with taking things as they are for granted, but is looking to the future and making adjustments which the necessity of tomorrow may dictate.

Will Study Canadian Method

Soviet Government Interested In Dr. Barnes' Ice Destruction

Dr. Howard T. Barnes is planning to go to Russia, for a two years' stay, if satisfactory arrangements can be made to take care of his Canadian interests, he announces. A commission has been named by the Soviet Government for the study

of Dr. Barnes' method of ice destruction, and his personal supervision by the engineers in charge has been requested.

As Dr. Barnes now occupies only an honorary professorship at McGill University, Montreal, there will be no difficulty in that quarter, but he has been asked to resign his position in Montreal, and the appointment of a principal to replace him there is a duty that must precede his departure.

In Different Form

A diamond, a lead pencil, and a piece of coal are made of the same stuff. These three things are really carbon in different forms, and are just as much one as ice, liquid water, and water vapor. All over the world we can find things which look very different, and yet actually, they are just one and the same thing in different forms.

Stunts Planned For This Year

One Man Plans To Walk Across English Channel

It looks as if 1930 is going to distinguish itself as a year of amazing stunts.

Heretofore are just a few of the things that carefree men and women are planning to do during the summer.

Fly an engineless glider across the Irish Sea from Holyhead to Dublin. Hawk across the English Channel on water boots.

Cross Niagara in a miniature submarine.

Walk blindfold around the top of one of the tallest buildings in Britain.

A young airman, Mr. Alec B. Trafford, of Birmingham, is to attempt the dangerous feat of flying a glider across the Irish Sea. He has already had considerable experience in glider flying in Germany, and is now at work on the machine with which he intends to make his big attempt.

The man who is hoping to cross the channel on water boots is Mr. J. Hazard, who has invented an ingenious device consisting of a pair of ordinary shoes attached to the tops of two right-angled tubes, which he inflates with a bicycle pump. To help him in his 21-mile stroll across the waves he will use a pole attached to another inflated bag. He will obtain refreshment from a floating quick-ink counter, to be established somewhere near mid-channel.—(From Pearson's weekly.)

PEOPLE "ALL NERVES"

What To Do If You Find Yourself In This Condition

The sort of thing that specialists call nervous debility is the run-of-the-mill condition caused by over-work and over-exhaustion. The sufferer feels himself tired, low-spirited and unable to keep his mind on any thing. Any system now starts up, the heart palpitates violently. They cannot secure sleep, and their hands tremble and legs seem unable to support them. Such a condition is not a terrible one.

Decorating the nerves with sedatives is a terrible mistake. The real nerve tonic is a supply of good red blood. The sufferer needs for nervousness and run-down health is Dr. Williams' Pink Pills, which promptly build up and enrich the blood. The revived appetite, the strengthened nerves, improved spirits and new strength which come as a consequence of these pills will delight any sufferer.

You can get these pills from any medicine dealer or by mail at 50 cents a box from The Dr. Williams' Medicine Co., Brockville, Ontario.

Preparing Eggs For Storage

The new egg-storing and egg-processing plant at the Pacific Coast Terminal, Limited, is now in operation, preparing eggs for storage and handling them at the rate of 500 cases a day.

Miller's Worm Powder not only make the infantile system not only for worms, but by their action on the bowels, they help to correct such troubles as lack of appetite, biliousness and other internal disorders that the worms create. Children thrive upon them and no matter what condition their worm-infested stomachs may be in, they will show improvement as soon as the treatment begins.

Something New In Business

Renting overcoats has proved a successful business for a store at East Ham, London, England, during the recent chilly weather. The rate for use of the garments is the equivalent of four cents a day, and a small deposit is required. Many rent the garments for only one day.

Could Hardly Live For Asthma, writes one man who after years of suffering has found complete relief through Dr. J. D. Kellogg's Asthma Remedy. Now he knows how needless is his suffering. This medicine has really given him help to all ailments with asthma. Inhalant, as smoke or vapor it brings the help long needed. Every dealer has it or can get it for him from his wholesaler.

Value Of Timber Increases

Special timber buyers to establish the true value of timber holdings and the transfer from "wild land" to the timber land categories of certain areas in British Columbia have increased the assessed value from \$18,229,927 in 1927, to \$25,819,710 in 1928.

First-Aid

For all pains and aches, foot troubles, cuts and bruises, general massaging purposes, Minard's simply can't be beaten.

MINARD'S
KING OF PAIN
LINIMENT

24 Hours Ends COLDS

You can send the soothing vapor of the pine woods to the cause of your cold by inhaling Catarrhoxone.

Little drops of healing balsams are distributed through the whole breathing apparatus in two seconds.

Like a healing breeze, that's how Catarrhoxone works in bronchitis, catarrh, colds and irritable throat. You simply breathe its healing, fragrant vapor, and every trace of congestion and disease flees as before fire.

Catarrhoxone

A Ten-Minute Relief

No trace of the disease remains after Catarrhoxone is used—no more mucus to clog the nostrils—no more headache and buzzing ears. Two months' treatment (guaranteed), price \$1.00, smaller size 50c, at all dealers.

A Blind Soldier-Lawyer

South African War Veteran Practices Profession In Ontario

Those who know him well never think of Colonel Lorne W. Mulloy, blind South African War veteran as sightless. Colonel Mulloy, long known to the British and Canadian peoples as Trooper Mulloy, is an active law practitioner at Iroquois, Ontario.

His pleadings take place largely in Cornwall, and one recalls that the first case he handled was as defending lawyer in a murder trial there. When Colonel Mulloy came back from England after his Oxford studies, General Smuts, then Canadian minister of militia, found him a post in the Royal Military College, where he remained several years. He was used as a recruiting officer throughout Canada during the Great War.

Then he decided to study law, on the advice of his friend John Godfrey, K.C., of Toronto. The colonel read his law course in one year, which usually takes three years, and the Ontario Law Society called the distinguished soldier and scholar to the bar. He decided to live in Iroquois, which he knew from youth, and bought a fine old stone residence and garden on the banks of the St. Lawrence River at that place, changes in which he directed himself.

Camper Carry Minard's.

Resting Place Of Statesmen

Lord Balfour's desire to be buried on his own estates recalls the variety of attitudes statesmen have adopted towards sepulchre in Westminster Abbey. Both Law, a Presbyterian, and Gladstone, a convinced Anglican, both rest in the Abbey alongside the Pitts, Peel and Palmerston—Anglicans all. The Russian statesman, Disraeli preferred a country church, and both Salisbury and Lord John Russell were buried by their ancestors rather than in the Abbey.

For Scalds Or Burns.—Dr. Thomas' Eucalypti Oil is a standard remedy for the prompt treatment of scalds and burns. The healing power quickly soothes the pain and aids a speedy recovery from the injury. It is also an excellent remedy for all manner of cuts, bruises and sprains, as well as for relieving the pains arising from inflammation of various kinds. A bottle in the house and stable saves many a doctor's and veterinarian's fee.

A New Motor Disease

"Driver's heel" is the latest disease. Rough roads, requiring constant working of pedals and controls, are responsible for this trouble, which can be very painful. Doctors with patients suffering from the new ailment are recommending the best means of some soft material should be provided by motor manufacturers, particularly for racing cars.

Why suffer needlessly? Douglas's

Egyptian Liniment brings quick, sure relief to acid feet, stiff corns, aches, etc. Relieves inflammation. Remove proud flesh.

Can Supply Canada's Needs

An investigation made by the Canadian Government Department of Mines shows the sodium sulphate deposits in Saskatchewan containing over 100,000,000 tons of natural hydrous salt, enough to supply the Dominion's requirements and to furnish surplus for export. One of the chief uses in Canada of this "salt cake" is in the production of sulphate or krap pulp.

If you do only what you're compelled to do, you're a slave; and the way to set yourself free is to do what you are not compelled to do.

Peace Park At Border

Washington State School Children Subscribe Toward Its Establishment

Thirty thousand school children in the state of Washington, have subscribed ten cents each while their teachers have given twenty-five cents each, toward the purchase of 85 acres of land on the United States side of the border for the establishment of an international park at Blaine, on the International Boundary.

The Trades and Labor Council at Vancouver were told by a visiting delegation from Bellingham, Washington, of the donations. It would be the first international park of land in the world, the delegates said, urging that an equal amount of land be provided on the Canadian side.

"If the same interest is taken on the Canadian side," it was stated, "the project will be a great success."

It was suggested that an annual celebration might be held by both countries at the park on the second of July each year.

Persian Balm preserves and enhances women's natural features, beauty. For sheer feminine loveliness it is unequalled. It imparts a youthful charm to every complexion. Delicately recommended to make hands and white. Delicately fragrant. Preserves and enhances the loveliest complexions.

Around the Corner

Since the stock market crash last October, none of these economic and financial wizards have ventured to cheer us up with the yarn that "good times are just around the corner." It seems that no one has any idea what's around the corner—and never did have.

Use Minard's for Burns.

Mark Twain once said that there were two occasions in a man's life when he could not understand a woman—before he marries her and afterwards.

In Baltimore, Ohio, there is a monument to Adam.

Our Stomach

Just a tasteless dose of Phillips' Milk of Magnesia in water. That is all, simple, effective, yet harmless. It has been the standard antacid for 50 years among physicians everywhere. That is Phillips' Milk of Magnesia.

Be sure to get the genuine Phillips' Milk of Magnesia prescribed by physicians. It is the only one that is safe, effective, and efficient way to kill the excess acid. The stomach becomes sweet, the pale de-

parts. You are happy again in five minutes. Don't depend on crude methods. Employ the best way yet evolved in all the years of searching. That is Phillips' Milk of Magnesia.

Be sure to get the genuine Phillips' Milk of Magnesia prescribed by physicians. It is the only one that is safe, effective, and efficient way to kill the excess acid. The stomach becomes sweet, the pale de-

Thousands Driven From Homes By Devastating Floods In Arkansas

Texarkana, Ark.—Northeast Texas and southwest Arkansas faced the worst flood threat in many years as raging waters of the Red River cut off highways and railroad traffic, swept away highway bridges and forced hundreds of lowlands residents to higher ground.

House parties were battling the swirling currents in attempts to bring out trapped residents. Levees were reported weakening under the pounding near Fulton.

The Red River was over two feet above flood stage and official river bulletins showed a steady and rapid rise. Rainfall for the past 72 hours in this section is over 13 inches.

Fear was entertained that the levees at the little town of Innes the situation was said to be acute. Garland was isolated and no reports were to be gained.

Crop losses already are tremendous, while paved highways were being swept away and railroad tracks weakened.

St. Louis, Mo.—R. C. Benson, chairman of the American Red Cross chapter at Eldorado, Ark., advised division headquarters of the Red Cross here that approximately 2,500 persons were affected by a flood in the vicinity of Griffin, Louisa and Smackover, Ark. He said a refugee camp has been set up and is supplying clothing, food and shelter. No estimate of the possible loss of life was given.

Workers' Bill For Debate

Measure Has Been Referred To House Of Commons

Ottawa, Ont.—A measure respecting employment of Canadian workmen on Dominion Government contracts was referred in the House of Commons to the committee on industrial and international relations.

The sponsor of the bill, Dr. J. E. Guerin, (Liberal, St. Ann's), informed the House that the measure was of serious interest to labor, especially in the City of Montreal. Brief the purpose of the bill, he proceeded, was to provide that there should be no age limit in respect to Canadian workmen seeking employment on government contracts.

Pay Tribute To Explorer

Oslo, Norway—Norway recently paid official tribute to Dr. Fridtjof Nansen, whose sudden death occurred May 13. The Storting, or legislature, held an extraordinary meeting at which President Hambro visited at the praise of the great explorer and humanitarian. The Storting's offer to pay the explorer's funeral costs was accepted by the Nansen family.

England, France, Germany, Russia and The Netherlands are now operating air lines in Persia.

Hon. Ramsay MacDonald Explains Why Naval Conference Was Called

London, England.—Prime Minister Ramsay MacDonald told the House of Commons the primary reason for the London naval conference which he declared, was the United States' program of naval construction.

"We were perfectly agreeable that the United States should build to 'parity,'" said Mr. MacDonald, "but what had not been settled was 'What was the program of parity?'"

"Many thought it was unnecessary to pursue the Washington agreement any further," continued the prime minister, "and they said: 'Why should we worry about the force America is putting upon the waters? While this view was most attractive I was very unsound."

"If the whole world occupied to America the same happy relations that we did, and do, it would be a round view, but, unfortunately, that was not the case. Whether we took notice of what America was doing or not, other nations would, and with the building of these other nations we are concerned.

"Consequently we were forced to the conclusion that the foundation of real security was an international understanding between America and ourselves, such as we were able to effect at the London conference. That piece of work has been done."

"The spectacular effects would

Delegates To Labor Conference Named

Selections Have Been Announced By Hon. Peter Homan

Ottawa, Ont.—Gerald H. Brown, assistant deputy minister of labor, and Dr. W. A. Riddell, Canadian advisory officer resident at Geneva, will be the two official Dominion Government delegates to the 14th annual meeting of the International Labor Congress meeting at Geneva, on June 10 next.

Mrs. F. F. McWilliams, of Winnipeg, has been named to accompany three Eastern Canadian delegates as technical advisors to the official delegates. Announcement of the selections was made here by Hon. Peter Homan, Minister of Labor.

Major J. H. Roaf, chairman of the British Columbia division of the Canadian Manufacturers' Association, is to attend the congress as representative of the employers of British Columbia. The president of the Trades and Labor Congress of Canada, will represent the workers.

Seek Approval Of Dominion

Necessary For Canada To Endorse Naval International Treaty

Ottawa, Ont.—Parliamentary approval of Canada's execution of the five-power naval disarmament agreement is expected to be given officially in the House of Commons. The necessary resolutions will be introduced by Premier W. L. Mackenzie King, declaring that "it is expedient that parliament do approve of the international treaty for the limitation and reduction of armaments, London, England, April 22, 1930, signed in respect of the Dominion of Canada by the plenipotentiary named therein, and that this house do approve of the same."

No Change In Surveys

Ottawa, Ont.—Return of the naval resources to the western provinces, which is expected to bring an arrangement between the Dominion government and the provinces concerned regarding the confinement of aerial forest protection work in the west, having no immediate effect upon the air fleets of the government, for this year extensive plans are underway for the protection and survey of wide areas all over the prairies.

Postmasters Organize

Kamloops, B.C.—Domestic trade organization of postmasters was organized here when the convention of British Columbia postmasters decided to join the other provinces. W. A. Wylie, of Kamloops, was appointed temporary chairman of the provincial branch.

HER MAJESTY THE QUEEN AND HER GRANDDAUGHTER

Queen Mary and the members of the royal family have been once again brought strikingly into the spotlight of public esteem by the biography of her majesty by Charlotte Cavendish, recently published in London. Photographs above of her majesty and Princess Elizabeth, granddaughter of the queen, are by Marcus Adams, of London, England, and are reproduced here through courtesy of Toronto members of the Photographers of America

Survey Of Natural Resources In B.C.

Information Is Being Sought On Peace River Block

Victoria, B.C.—Under an agreement between the British Columbia government and the Canadian government, the Canadian National Railways and the Canadian Pacific Railway, announced by Premier S. F. Tolmie, a systematic natural resources survey of the Peace River Block will be launched almost immediately and carried on all summer.

The survey organization under Major C. R. Crysdale, which conducted the Pacific Great Eastern Railway survey of last summer, will handle the Peace River block investigation also.

The government and the two railways will share the cost of the work jointly as before.

"We need this information on the Peace River block before we can intelligently deal with the future of this great area of about 3,000,000 acres," the premier announced.

Papers Resent Action Of Scotland Yard

Protest Against Method Employed In Reference To Leakage Of News

London, England.—In connection with the probe into the leakage of news from government sources following the arrest of Gandhi in India, the Newspaper Owners' Association has raised its powerful voice against certain sections of the Official Secrets Act of 1920, under which the detectives secured their warrants to invade the home and question the newspapermen. The association has adopted a resolution regretting the government action and calling it unjustified interrogation of a journalist who collected his news by a legitimate and open method. The resolution expresses concern for the freedom of the press and demands amendment of the act in the public interest. A copy of the resolution was forwarded to Prime Minister Ramsay MacDonald.

Receives Fellowship

Winnipeg, Man.—Dr. Murray Clegg, of Winnipeg, has been selected for a fellowship in Public Health in the Connaught Laboratories of the University of Toronto. Word to that effect was received by Dr. T. A. Pincock, deputy minister of Public Health, from Dr. Fitzgerald, director of the Connaught Laboratories and the school of Hygiene of the University of Toronto.

Fine Pedigreed Stock

Winnipeg, Man.—Considered by Professor W. L. Carlyle, manager of the Prince of Wales ranch at High River, Alberta, the finest shipment ever brought to Canada, 70 head of pedigree stock moved through Winnipeg recently over Canadian Pacific lines. His Honor, Lieutenant-Governor J. D. McGregor, and many other interested visited the thoroughbred freight to look over the livestock.

Invitation For Canada

Geneva, Switzerland.—Canada, among 23 other nations, is to be invited to participate in a conference summoned under the auspices of the League of Nations to the limitation of manufacture of opium.

Progress Of Canada As Seen Through Eyes Of Writer In New York Times

Arthur Elliot Sproule, writing in the New York Times says, "though it be that we are all undoubtedly getting more and more 'internationally minded,' yet the job is no enormous that, for most of us, only the very biggest foreign events seem able to catch our attention—great things like the naval engagements in London and the Soviet attitude toward religion, for example.

So true is this that—possibly because our mental eyes get a little out of focus by looking at distant objects—we are often startled to find how little we are seeing of events that lie under our very noses, as it were.

Take Canada, for example. What do most of us know of this great and growing nation that stretches at our very doors? Its progress fully merits the word 'astounding,' and yet few Americans know anything about it. For instance:

The port of Halifax has increased its tonnage by 40 per cent. in twelve months. The port of St. John, ranking after Montreal and Vancouver in the amount of traffic handled, has first among Canada's winter ports, the largest dry dock in the world. Moving west, Quebec produces 65 per cent. of the world's supply of asbestos. Water-power projects are being successfully brought into operation, and other great and far-reaching changes have taken place.

Suppose you were asked to name the greatest port on the Atlantic Coast, after New York—would you immediately answer "Montreal"? Yet it is a fact that the harbor of Montreal, 1,000 miles from the sea, is the second port on the North American Continent, St. Lawrence Bay being greater. At Sault Ste. Marie the canal carries more traffic than the Suez, Panama and Manchester Ship canals combined.

Winnipeg, the centre of the wheat country, has taken on added importance as the headquarters of a new mineral area, and it may well be that in the future the mineral products of the Province of Manitoba will vie for supremacy with the Province's enormous grain resources.

Further west again, Turner Valley, Alberta, has drawn the attention of the world to its potentialities as an oil producer.

On the Pacific Coast, Canada possesses vast wealth, notably in her lumber resources, and there are vast gold mines in the mountains.

Passing to world trade, observe that Canada leads all other nations in the production of newsprint, nickel, asbestos and cobalt. She takes second place in the production of wheat and automobiles, and third place in the output of lead and gold. As an exporter she stands third among the nations of the world.

According to recently issued trade statistics for the year 1929, Canada holds fifth place in aggregate import and export trade, and fourth in export and total trade per capita, third place in favorable trade balance, and second place in favorable trade balance per capita.

There is no need to be wearisome, but it is surely well to face even a few salient facts such as the foregoing. We have quite a neighbor up north!

Huge Bridge Nearing Completion
The bridge over the harbor at Sydney, Australia, is nearing completion. The structure, costing \$20,000,000, has a span of 1,620 feet, and accommodates a roadway 77 feet wide, four electric tracks and two bicycle ways. It is estimated that changes in temperature will cause a maximum expansion of 14 inches. The bridge is the world's largest of its type.

Wonder will this reformed calendar they're talking about, be so fixed that a fellow won't get his tax bill just when he's saved up enough money to have the house painted?

"Is your dog of pure breed?"
"Wine Merchant: 'Yes, indeed.' Do you think I have poured water into him?"—Pages Gales, Yverdon.

PRETTY HOUSEWARE
All Tinger models are created in Paris and sketched by her there. The patterns are made and adapted for American women in New York by American patternmakers.

Fashion edition weavers in her affection for spots. They have no fresh and trim an effect. They are chic, too, and add an air of charm to the simplest of models.

White spots on a blue ground were chosen for this attractive housecoat. The trims were white. The neck line merging into two front pieces on the bodice has a very slimming effect, which is helped still further by the point on the skirt. Slight shaping of the lower skirt section gives grace and free movement.

Other schemes besides spots could, of course, be used for this model. Plaids, checks, stripes and flowered patterns with contrasting trims would all be good. All at standard washing cottons are suitable. Washing silks and rayons can also be used.

This pattern may be obtained in sizes 16 to 20 and 34 to 42. It is ready for immediate delivery. It is hand cut.

Pattern price 25 cents. Be sure to fill in size of pattern. Address: Pattern Department.

When Motorist Should Rest

No Man Has Right To Drive When He Becomes Drowsy

Although the busy motoring season has just started, the first accident caused by a driver falling asleep at the wheel has been reported. Three New York motorists were injured when a car driven by a man so exhausted that he fell asleep at the wheel went into a ditch. This is the kind of accident that should never happen. No man has any right to drive a car when he is in such a condition that he is apt to become drowsy. Common sense should tell any car driver when he is nearing the limit of endurance, and he should then be prepared to sacrifice time for safety by pulling off the highway and sleeping for a sufficient length of time to rest his faculties. It might mean the difference of a few hours in reaching his destination, but on the other hand it might mean the difference between reaching his destination without reaching it at all.

Many airports are being opened in Chile, which has ruled that its municipal dentists must speak Irish.

Louth, Ireland, has ruled that its municipal dentists must speak Irish.

Large Flock Of Swans Seen

Regina Man Reports Seeing About Eighty At Saskatchewan Beach

An unusually fine sight was witnessed recently by a Regina man, J. G. McKeechie, when from a boat off Saskatchewan Beach he watched a flock of 70 or 80 swans sweep down from the sky and alight on the water near him, like a great folla of youths. Mr. McKeechie, who has lived in the west 38 years, says that never before had he seen any swans at close quarters during the annual migration to or from their Arctic breeding grounds. Yet the swans is by no means uncommon during these periods. They were about the size of pelicans. None of the birds showed any uneasiness at the presence of the boat, and swam about on the smooth surface of the lake quite unconcernedly.

Mr. McKeechie described the call as "most peculiar," calling and answering each other almost like a dog barking, but hoarser. "This raised the question among us as to whether it was in fact a swan, or some other species of swans did these migrants belong?"

Unless there is indisputable evidence to the contrary, the only swan likely to be seen in these parts, or anywhere in Canada, for that matter, is the whistler. Its larger relative, the magnificent trumpeting swan, is now on the verge of extinction, and few have ever seen it in life. Yet the call heard by Mr. McKeechie did not appear to fit the whistling swan so closely as that ascribed to the trumpeter.

Ornithologists who have been queried on the matter were, however, frankly skeptical, doubting if as many as 70 trumpeting swans existed in all Canada.

Canadian Steamer Was First

Crossed Atlantic In 1833 Without Sailing Sails

Although some records state the first steamship crossing of the Atlantic was made in 1819, it is believed that a Canadian built ship, sailing from a Canadian port, first made the entire voyage under steam, some years later.

Though nominally steamers, such ships in the time of 1819, relied almost entirely on sails, when crossing the ocean, the engine, at a low rate of speed, being used only when head winds prevailed. This manner of navigating the long distance was a practice for a number of years.

In 1833, the "Royal William," of 180 horse-power, and 1,000 burden, was built at Three Rivers, Que., on the Lower St. Lawrence, for the purpose of plying between Nova Scotia and Cowes, Isle of Wight. She is believed to be the first ship to make the entire voyage across the Atlantic by steam. The occasion marked a new era in trans-oceanic communication, introducing a more powerful and faster class of boat, relying on the use of steam for motive power.

Or Fairly Good

Top windshield is cracked on left side; windshield is scratched where wiper has been; right headlight glass broken; left fender is split; right front wheel has sprung and wobbles; stolen night of February 12. Reward if returned in good condition.

PRESS DELEGATES FROM "DOWN UNDER"

It is estimated that in Chicago one million out of every five ends in divorce. We may be wrong, of course, but we have a feeling that the other four end in early widowhood.

C.P.R. GENERAL PASSENGER AGENT, WINNIPEG

H. R. Mathewson, who has come from a similar position in Toronto to become general passenger agent of the Canadian Pacific Railway, western lines, at Winnipeg, succeeding H. G. McNicoll.

Colorado Grain Growers

Coming To Exhibition

Will Be Well Represented When 1932 Show Opens

The growers of San Luis Valley, Colorado, U.S.A., will be well represented at the World's Grain Exhibition, at Regina, 1932, according to reports activities of the Farm Bureau Federation. Among other plans for the improvement of crops the bureau will give special attention to weed control, the securing of pure seed and the "preparation of a valley-wide exhibit at the World's Seed Show, Regina, Canada, in 1932."

The States of Montana will also be represented according to a letter received at exhibition headquarters from A. H. Stafford, commissioner, Department of Agriculture, Mr. Stafford says, "It is the plan of this department to prepare and exhibit grain at your conference in 1932. Will you kindly forward to us at this time detailed instructions as to the requirements for establishing such relations with us."

Filling Large Order

Vancouver Lumber Mills Working Overtime To Produce Shingles

Lumber mills in Vancouver are working night and day on the production of 400,000 giant red cedar shingles to cover the 151,000 square feet of roof on the Log Lodge Hotel at Lucerne-in-Quebec. The order, placed by the Lucerne-in-Quebec Community Association, Limited, with Alexander Murray Limited of Montreal, is said to be the largest single purchase of hand split shingles in the history of the lumber industry.

"There, now," said the suburbanite to his wife, "you've ordered flower seeds that take two years to bloom."

"Well, that's where you're all wrong," said the wife. "This is last year's catalogue."

It is estimated that in Chicago one million out of every five ends in divorce. We may be wrong, of course, but we have a feeling that the other four end in early widowhood.

Canadian Forest Growth Could Be Stimulated By Scientific Management

Convenience In the Poultry House

Work Should Be Made As Easy As Possible

When building a poultry house it is a matter of importance to see to it that it is not only located at a point easy to reach, but also that it shall be so arranged that the work of attending to the birds be made as easy as possible. The more convenient it is to do the work about the poultry house the surer it is that it will be done.

As the women of the farm usually look after the poultry, the work should be made as easy as possible. If the distance to be covered in going back and forth to the poultry house is twice as far as it need be the amount of extra walking thus involved may have the effect of adding drudgery to the task. The new bulletin No. 132, of the Department of Agriculture, at Ottawa, "Poultry House Construction," goes fully into the question of planning, and makes the observation that not only should the house be accessible, but the internal arrangement ought to be such that the work may be done with the least amount of labor. Among other suggested conveniences is the gate that swings both ways. The house may be carrying two pairs of water or feed, a gate that swings either way may be opened without stopping to set down the pails. A barrow load of gravel, or the laying of a plank will enable one to pass over a wet plank.

Another recommendation is the providing of a feed box in which supplies may be kept close to where they are needed. In poultry keeping, as in other farm work, labor is an important item, and in the building and equipping of a poultry house every consideration should be given to means that may be taken to reduce labor.

Land In Good Shape

Irrigated Area In Southern Alberta In Fine Condition

Irrigation carried out during 1929 was the biggest in the history of Southern Alberta, and as a consequence the land is in fine condition now, according to P. J. Jennings, supervisor of irrigation in the Calgary district office of the Dominion Water Power and Reclamation Branch. "Without exception, all the large irrigation projects in Southern Alberta used large quantities of water last fall," he said, "and in consequence their irrigated lands were in good condition this spring."

Feed As They Go

Many of the birds that migrate by day travel slowly and feed as they go along. The cliff swallow is said to average twenty-five miles a day at the first twenty days of its two thousand five hundred mile flight from winter to summer home, and increases this to sixty miles a day at the end of the journey, doubtless feeding to a greater extent during the early stages of the trip.

"The spelling books of fifty years ago war the best," writes an older writer to the Toronto Globe. "The young folks of today don't know how to spell."

An estimate of the total forest production of Canada for 1929 has just been completed by the forest products branch of the Dominion Bureau of Statistics. The estimate includes all the products of operations in the woods, the unmanufactured materials cut in Canadian forests during the year.

An estimate has also been made of the extent to which the forests are being depleted annually in the process of exploiting these materials. For this purpose converting factors based on actual requirements have been used. Each of these factors represents in cubic feet the quantity of standing timber that must be cut in the forest in order to produce one unit of the material in question, based on the total cubic contents of the tree. By the use of these factors it has been estimated that the total forest production of 1928 involved the cutting of 2,988,038,450 cubic feet of standing timber, or about 800,000,000 cubic feet. This constitutes only the annual depletion for use and it must be added the volume of material annually destroyed by fire, which exceeds 800,000,000 cubic feet of merchantable timber and young growth on 1,200,000 acres. Estimating the probable duration of the annual demand for the forest resources of considerably more than 4,788,000,000 cubic feet.

A total depletion of 4,788,000,000 cubic feet per annum does not necessarily imply that the total forest resources are reduced by that amount every year and the supply will therefore be exhausted in forty-seven years. Estimating the probable duration of supply of forest products is not a matter of simple arithmetic. The rate of utilization is far from constant. It tends to increase with the discovery of new uses for wood, the increase in population and the increase in demand for forest products from other countries whose supplies have been reduced to a greater extent than Canada's.

On the other hand, there is a steady increase in volume taking place in all healthy stands of timber due to annual growth. By the application of scientific forest management this annual growth can be increased to such an extent as to take place over the entire area of potential forest land, it is believed.

Preparing To Ship Fish By Airplane

Commercial Air Lines Around Great Lakes Will Speed Up Transportation

Other than flying fish will soon take to the air in changing their habitat from the Great Lakes to American cities. Commercial air lines around the Great Lakes, both in Canada and the United States, are preparing to transport whitefish, pickerel and other edible varieties of fish, from the shores of the Great Lakes to the railroads for quick shipment.

It is said that the movement of fish from inland lakes to railway contact has been successfully and economically accomplished in other localities and since the greatest industry of the great northwest is fishing, this outcome is anticipated.

Seeking Information

"John," said Mrs. Dumbell, "It says here the Russians and Chinese exchanged shots."

"Well," he grumbled, "what of it?"

"Well," she replied, "if they are friendly enough to exchange things with each other the war over there can't be very serious, can it?"

Foreman—Well, everything all right?"

Night Watchman—Yes, I have not done so far for the first night. I've checked everything off, and there's only one thing missing—the steam roller.

"The doctor told me that people should be of my complaint or become ill," said a woman.

"Doctors don't always know," you have not died."—Pages Gales, Yverdon.

Plan Your Town-- Save Your Money

Avoid Slums--Little Boy, 'Had No Walls' In His Home

Three other day the writer heard a conversation between two men on the street. One said: "What's all this fuss nowadays about town-planning? What is town-planning? Another fad to waste people's money?"

"No," said the other man, "it's just another plan to save people's lives and health and money besides."

He was right. Town-planning, done properly and early enough in the life of a growing town or city, does all those things. Perhaps the earliest illustration we have in history of town-planning is, however, a little unfortunate. When the great city of Rome was expanding in the centuries following the formation of the Roman Empire, the highly civilized Romans were so anxious to replace the old buildings and crooked, narrow streets that they put up a plan for private agitation by the result that, in the time of Nero, the older parts of the city were fired, and Rome burned.

Whether or not that be true, no one today advocates such drastic methods for saving the way for town-planning. It is today based upon cooperation between land-owners and municipal authorities, for the general good of the public, so that the city or town may be built to facilitate proper sanitation convenience and healthy and pleasant living arrangements.

Consider the important question of sanitation. If a city grows haphazardly, as most cities have done in the past, without its leaders giving a jealous eye to the future, that city's cleaning bills may be unnecessarily high. Expensive properties may have to be expropriated in order to lay sewers and water mains, or to put in pumping stations and other town-planning looks ahead and prevents such unnecessary expense.

"Those of us who live in Toronto every day a traffic situation which might have been averted by town-planning. Yonge Street, Toronto's main street, is too narrow to accommodate traffic. Toronto is now considering plans to re-model its downtown area. In other words, to town-planning which is a new idea, it is a fact that the city has saved had the civic fathers of years ago been able to foresee something of the city's growth and the complexity of twentieth-century civilization.

But from the standpoint of health, one of the most important considerations of the town-planner is the playground spaces as a rule. In Canada the growth of a city is usually in fact one might say always, an industrial growth. The growth of the Ontario city of Oshawa is an example. A number of industries, for reasons of convenience or cost, suddenly decide to take up their position at one point. The state thus favored is apt to grow with great rapidity, and unless the public men are statesmen who think in decades or even in generations instead of just terms of the city's growth of the next few years, the city is apt to be haphazard.

This city strikes by its own growth and by the very life that makes it great, its desirability as a place in which to live, and its value as a commercial center is increased. Proper planning of parks is a tremendous factor in the solution of this problem. For when a growing city takes trouble to lay out a system of parks, it will, chances are, give heed to the streets in proximity to those parks. And insofar as the health of the city is concerned, parks are vitally important.

It must be borne in mind at all times, that many people who will benefit most from the addition of parks to a city, will not take advantage of them unless they are made as easy as possible to reach. That is why you notice in most well-planned cities, that the parks are arranged so as to be on two sides of a road so that just as many people as possible can take advantage of their benefits.

If streets are planned so that the outside edges of the city are not too far to reach, the result is a great many cities have been artistic suburban sections where rents are cheap and working people can live in happiness and health. In this case, traffic conditions permit them to cover more distance in a shorter space of time in getting back and forth to their work. It would be possible if the conditions had not been studied in advance instead of letting them take their own natural course.

The habits of the citizens the nature of the soil, the levels of the land and a hundred matters come into the scheme of things in town-planning, but they are mostly problems for the engineers and the technical men. Nevertheless, they are of extreme importance and difficult to handle if there is not complete harmony in making the arrangements between the owners of the land and the people who are doing the planning.

Some cities have found themselves in a position where they could find that every house around them has a plot of land of decent size about it. Here is an enviable state of things and one that every municipality should seek.

When one starts to grow a garden, one carefully lay it out so that all the space within the garden space no matter how thick the growth may become. If the plants become too thick in one place, we do what we respect consideration from the people who are doing the planning.

It is rather difficult to "thin out" a city, so we must do all our thinking in town-planning in advance. It is better to have only a few years that town-planning has become a very active feature of our life. It is better to have a few years that town-planning has become a very active feature of our life. It is better to have a few years that town-planning has become a very active feature of our life.

People Expect Courtesy

Firms Whose Employees Are Polite Do Better Business

The public en masse may not be conspicuously polite, but it desires respect consideration from the employees of the concerns with which it may be doing business. It expects courteous and correct answers to its questions no matter how foolish and unnecessary they may seem to others; and if they seem to be unfamiliar with what to the individual may seem simple procedure, they do not wish to be treated as a bunch of fools. The public also has its self-respect rather seriously and if shown disrespect is likely to transfer its business to other concerns where it can get courtesy with its hands or its bread without extra cost. Many employers of labor recognize this and insist that their employees always be courteous no matter what the provocation.

This requires training and discipline. Courtesy can become courteous overnight. Courtesy cannot be put on like a garment. It must be inbred if it is to stand the hard wear and tear of business attention. We think might be paid by the home and the school in instilling and developing the habit of courtesy within the young. No young man, no matter how well educated he may be, is fitted to assume public duties unless he is always able to manifest courtesy toward others. The age of chivalry may be dead, as Burke said many years ago. But the age of courtesy will never die. Wise are the youths who realize the great potentialities of courtesy, and how essential it is to success. It should not be forgotten that while it will bring financial reward it insures something more than that. It gives them this, the esteem of one's fellow men.

Grows Millions Of Radishes

Texas Man Raises More Than Anyone In World

Upon the 1,400-acre farm of E. C. Caldwell, near Moreau, Texas, laborers are employed gathering radishes and beets for shipment to the markets of the north and east. Caldwell has 700 acres planted in radishes, and has already shipped 400 carloads, and still has approximately 200 carloads to gather before the season is closed. Each car contains approximately 75,000 bunches of radishes and the total number of bunches shipped by the end of the season will be around 45,000,000. Mr. Caldwell is said to be the largest radish grower in the world.

The Young Man: "I've come to see you about your daughter."

Girl's Father: "Too late--she's eloped with a young fellow who has no money."

The Young Man: "You're right about the money--but I'm not a fool."

Similarity Between Indians and Chinese

Both Have Great Reverence For Their Women Ancestors

The modern Indian no longer adheres to primitive ways in many of the matters touching his daily life. But he has evidently still an innate respect for the tribal customs of his long ago when it comes to methods of government.

By a ballot vote of the residents on the Oneida Reserve, in Ontario, it has been decided that the women shall continue to elect the chiefs and council. Thus the modernistic tendencies of the younger generation, a generation that rides in automobiles and has been educated in a modern academic and vocational school, have been squelched for the time being.

It is not surprising that modernism should seek to find expression in the exercise of the franchise. In this case the modernism took the form of demanding votes for men; not votes for women. Therein lies the difference between the Indian way of looking at things and the ways of the white world.

Presumably the method descends from the ancient belief in and reverence for women ancestors, a belief which the Indian elevates to a cult. The same idea is even more strongly marked in the Chinese, who are the most ancient ancestor worshippers in the world, particularly of women who are the heads of families. The most powerful figure in a Chinese family is a grandmother. Her word is law in all matters concerning anything that pertains to family affairs, even her eldest son being a mere nonentity by comparison. To argue with a grandmother, to make a suggestion that differs from hers in the smallest degree, to refuse to do as she says, is tantamount to a heinous offence which nothing but death can expiate. Her position as a grandmother, her years of experience, are revered as nothing else can be.

The modern Indian is a far more enlightened being, however, than the average Chinese. But there appears to be a similarity between the aboriginal Canadians and the Chinese in respect for the wisdom of the womenfolk.

The Sea's Greatest Depth

Spot Near Philippines Is Just Short Of Seven Miles

Soundings of the Mindanao Deep in the Pacific Ocean show fathoms deep, proved recently that the sea's greatest depth is 35,410 feet, which is just short of seven miles. In such a hole the highest peak would be lost more than a mile below the waves. From the top of Mount Everest to the bottom of Mindanao Deep is a vertical drop of little over twelve miles. Accurate and rapid measurement of these great depths was made possible by the "echo depth finder," a device developed during the World War, that uses the echo from the ocean floor in making its soundings. If the bed of the North Atlantic were drained away, a great pit, 27,972 feet deep, would be found in the Porto Rico market. The spot of the Atlantic's greatest depth, a plateau would be found near the Azores and a vast table land would appear in Newfoundland. A typical cross section of the ocean made by the U.S. warship "Stewart" in 1922, in the North Atlantic, proves, that great stretches of the ocean's floor are comparatively level.

A course in blind flying for aviators, to accustom its traffic pilots to night and fog flying, has been established by a German air transportation company.

C.P.E. ASSISTANT PASSENGER TRAFFIC MANAGER

N. R. Debrisay, now assistant passenger traffic manager for the Canadian Pacific Railway, western lines, succeeding C. E. McPherson, retired.

Mr. Debrisay was formerly general passenger agent at Vancouver.

By a ballot vote of the residents on the Oneida Reserve, in Ontario, it has been decided that the women shall continue to elect the chiefs and council. Thus the modernistic tendencies of the younger generation, a generation that rides in automobiles and has been educated in a modern academic and vocational school, have been squelched for the time being.

The Maple Sugar Industry

People Of Canada Can Consume All That Is Produced

That Toronto newspaper which says that the maple syrup and sugar industry of Canada faces ruin because of the new United States tariff the duty on these products is to be higher bids far to drive the comic journals out of existence. In Canada the maple syrup and sugar industry is a small and is growing smaller, not because of hostile tariffs, but for the reason that maple groves are becoming fewer in number and reduced in size. Should not a drop of maple syrup or an ounce of maple sugar leave Canada, the people of the Dominion can easily consume all of it. These are wholesome articles of food, and the people of this country would do well to use more. People of the prairie provinces would be glad to have available to them all of these products they want.

Sunshine Is Essential

Poultry House Should Face South Or South-East

Experience has taught that the poultry house should face the south or south-east. This is important as it admits the maximum of sunshine which is the cheapest disinfectant. If, however, it is not convenient to build a permanent house with its face to the south, the Dominion Poultry Husbandman, in the new bulletin No. 132, of the Department of Agriculture, at Ottawa, states that good results have been obtained by putting a row of windows along the back of the house under the drop-board. When this is done it is of great importance to have the windows tight so that no draught will strike the hens.

Another suggestion contained in the bulletin is that where permanent poultry buildings are being constructed that they be planned so that they may be enlarged or added to as poultry operations grow.

Always Pays

A St. Louis man who was quartered in a small French village during the war, where he struck up an intimate friendship with one of its citizens, has received word that his friend thus acquired has bequeathed him an old brick house valued at \$27,000.

Kindness does not always pay in such large financial returns, but it always pays.

Ocean Safer Than Lakes

Captain Wood Rather Navigate Ship In Deep Waters

On the Great Lakes sailors class as men who follow a seasonal occupation. That may sound to salt-water people like an opening for Jerra. Seamanhood looks a bit like farming when men remain snugly on shore during the four or five cold months and stormiest months of the year. Poets and story writers, at least, appear never to have found much appeal in the lives of the summer sailors of the inland seas. Literature which would produce thrills must have its heroes face fearful things in winter. To be shattered by the blast between May and November gives more the impression of an unlucky accident than an adventure.

Any who are inclined to that hasty view, however, should form a chummy acquaintance with some old lake man and hear his opinion of the comparative ease of salt-water navigation, where there are thousands of miles of water in which to keep a ship afloat. Why should a vessel ever be lost under such conditions? Here on these inland seas a ship never gets more than about fifty miles from land. The hurricane that on salt water makes the mariner shudder, the catfish on the lakes with no room to flee. And a score of two heeled driving before the wind would bring him on the rocks almost anywhere. Handling a ship where the nearest land is five miles under the keel isn't much to worry about, the lake sailor declares. It is when the land lies all around him that the navigator must keep awake.

That condition prevails all the time everywhere on the Great Lakes. The lake captain must know not only his ship, but his shore. He must be not only a seaman, but a pilot, with more than 1,000 miles and more between Buffalo and Duluth or Chicago as the field of his special localized knowledge.

One On the Policeman

New York Man Gets Best Of Argument About Parking

The other day a young gentleman parked within ten feet of a fire hydrant in West Street—or so a policeman said. "I'm going to give you a ticket," said the policeman. "Wait a minute," protested the young fellow. "How do I know I am too close to that hydrant?" "I'll show you," the policeman replied, and stepped off the distance, toe and heel. It came to nine and a half feet—policeman's feet. "What does that prove?" demanded the young man, who must have been of enormous courage. "Maybe your feet are more than a foot long. Certainly," he continued with a downward glance, "they look much longer to me." The policeman stared at him dazed and then, muttering feebly, walked away.

Had Enough Of Sea

Two sailors in a train were discussing the general situation. The tall one: "When I got done with this hitch, I'm going to get me a pair of nice light oars, and I'm going to sling them across my shoulder and start to walk in inland. When I finally hit a place where people say, 'What a fine view of the sea from your shoulder?'—boy, that's where I'm going to settle down."

Good For Zero Weather

A "heatable" shoe has just been invented by a Hungarian shoemaker. An electric pad is concealed between the inner and outer soles, and the wearer may heat it by attaching a connector in the heel with a wall plug. The heat lasts about an hour and a half.

Obligations Of Industry

Employers Should Consider Welfare Of Those Who Make Business Possible

Industrialists who consider only profit and loss sheets and do not consider the welfare of the employees who contribute so much to the profits are, in the opinion of Mr. Denton Haskins, morally no further advanced in the civilization than the cave-man in his. Mr. Massey was speaking at a meeting of the Industrial Accident Prevention Association.

Industry has made a great deal of progress in that direction during the present century, although the impulse has come more from within than without. Legislation has compelled the use of safety devices and the taking of many other precautions to prevent accidents, and there seem to be more accidents than there used to be, that is no doubt due to the fact that there is so much more machinery in operation.

Employers cannot regard callously the mistaking of men and women who may only be cogs in a great industrial machine. To lose a hand or arm, or even a finger, to lose an eye, or even to be injured in a way that is a deplorable misfortune. Anyone who has had an injured arm and been unable to use it for some days can fully realize that.

There is another form in which employment is a great blessing to the workers. That is to ensure practical security of tenure to the efficient hands so far as their jobs are concerned. It is not to be taken for granted that a man who has been in a home, and if they lose their employment they may lose all they have. There is no denying blight on a man's efficiency that the spectre of unemployment. An employer should have a strong moral reason, as well as an economic one, for deciding to turn a man out of his job.

Pure Seed Important

Soil Conditions Should Also Be Considered When Selecting Variety

With the wide range of climatic and soil conditions which obtain throughout Canada, purity of variety is need of outstanding importance. A variety which gives good results in the southern and eastern sections of the Dominion often proves entirely unsuited to the more rigorous conditions of the heavier soils and harder climatic conditions of the north or west. There is also a marked difference in the color and quality of different varieties of the same seed, and with grain it is particularly important that the seed sown should be pure as to variety.

The Dominion Seed Branch are extending the work of purity of variety tests this year. Samples of the branch have already obtained samples of the need of cereals, field peas, and beans, from seedmen throughout Canada. The cereal division of the Dominion Department of Agriculture, at the central experimental farm, will test these samples for purity of variety and the results of these tests will prove particularly important to the trade and to Canadian farmers.

In Commercial Class

Saskatchewan lignite was placed definitely in the commercial coal class when the first tests to illustrate the utility of the coal were made in Regina, says the Canadian Press. The tests were conducted under the direction of H. J. A. Merkle, Provincial Minister of Forestry, Labor and Industries. The development of a great coal industry in the southern part of the province is predicted, as well, from the engineers' findings.

Famous Cattle For Canada

A dispatch from the Isle of Jersey states the cattle industry of the island has received a severe shock in the announcement that Joe Peres, Jersey's foremost breeder, has sold his herd consisting of about 100 head of prime cattle to Messrs. S. H. Hull and Co. of Brampton, Ontario. The Jersey breeders regard it as something of a calamity that the herd should be allowed to leave the island.

"Go and buy a big trying pan and a gallon of oil."

"What for?"

"I'm going fishing."—Pages Gates, Yverdon.

John Gay's second comic opera, "Polly," which forms a sequel to "The Beggar's Opera," following the masquely Captain MacClatch from a London goal to scenes of new adventure in the West Indies, and introducing the celebrated Polly Peachum, was presented for the first time on the air on Sunday, May 31, from 9.15 to 9.45 p.m., eastern daylight saving time, in the Canadian Pacific Railway's programme of music from station WJZ and twice associated stations of the National Broadcasting Company.

The following well-known Canadian artists took part in this presentation: Jeanne Dusseau, soprano, as "Polly"; Allan Burt, lead of the American Opera Company, as "Captain MacClatch"; Masquerade as "Morana"; a minuet; Beatrice Morson, contralto, as "Mrs. Trapes"; John Pettit, baritone, as "Lieutenant Vanderbluff"; and Alfred Heather, tenor, as "Mr. Duast."

Lady (to man with hat on back to front): "Yes, but are you coming or going?"—Guillevet, Madrid.

Reduction in Prices of TEAS

Effective Immediately

10c. per pound reduction on Green Label Black Tea.

5c. per pound reduction on All Other Grades.

Higher Markets for finest quality TEAS, which are scarce, preclude greater reduction.

All Grocers are authorized to sell their present stock at these reductions. We refund to the Grocer the drop in price. We bear the loss.

CHARTER XIII—Continued

"Oh, Grandma! You might have made him angry."

"Not Gam Garfield. He likes to make believe he's stern, but he's real good-natured underneath. He laughed. I guess he forgot he was a lawyer with an important case. And then he sat right down where you are, child, and said: 'It's you who ought to be spanked, Grandma Davis. You charged my client ten dollars for a string of beads that's worth about ten cents.'"

"Ten dollars?" gasped Charman. "What an idea! But you did charge too much, Grandma, and—"

"I never heard there was a law to keep a body from getting as much as he could in a trade," interrupted the old lady. "It said as much to Gam, and he had to admit that the law was on my side—considering. And I told him, that if that Edgar Purdie said he paid ten dollars for those beads, why he was a liar on top of all his other sins. I was real top-notch."

Troubled though she was, Charman couldn't suppress a laugh at the picture Grandma's words brought up. "I guess he saw I was kind of riled," went on the old lady. "He cause me said, 'Don't you worry.'"

READ OF A CASE LIKE HER OWN

Decided to take Lydia E. Pinkham's Vegetable Compound

Moneton, New Brunswick—"Before my little baby was born I was weak, nervous and discouraged. I saw an advertisement in the paper about a woman who had been like me. I bought a bottle of Lydia E. Pinkham's Vegetable Compound. I took three bottles and it carried me safely through that critical time."

"I have three children to care for and I didn't feel well and strong. I was told to get other women about your medicine."—Mrs. Geo. Anderson, 92 Albert Street, Moneton, New Brunswick.

W. N. L. 1838

Grandma. I won't let you get into any trouble if I have to commit perjury myself to prevent it, but what did the deacon pay for those darn beads?"

"Did you tell him?" asked Charman breathlessly.

"I did; but not till I'd asked if he was making a social call or was in the interest of his client. He grinned and said, 'You ought to have been a lawyer yourself, Grandma Davis; but I'm just dropping in to pass the time of day with our old friend.' So I told him the whole story, Charman. Honestly, child, I thought he'd have hysterics. There wasn't a shred of dignified lawyer left in him when I got through."

"But what he's going to do?" Charman asked. "I don't know Gam, but he's not dragged in; and we won't be, or I don't know Gam. He said, 'I thought he'd have hysterics. There wasn't a shred of dignified lawyer left in him when I got through.'"

"Well, dearie, maybe you'd better get us some dinner. It's been an exciting morning and I feel all gone. Out of everything else there was a fearful cut in Lizzy Baker's yard. I could hear the jowls as long as if they were in there, they'd be at it now if George K. Knowles hadn't come along and turned Lizzy's nose on 'em. And there are folks who say that nothing happens in Wickfield."

Charman laughed as she went toward the kitchen, glad there was enough excitement on hand to keep Grandma from asking too many questions about her ride with Jim; but as they were finishing their meal the old lady queried suddenly: "Did you enjoy your ride? And did you get my catalogue from Emmy?"

"Oh, dear!" cried Charman, "I left it in the car."

"It's no great matter," responded Grandma comfortably. "If Jim finds it he'll bring it round to-night. Like as not he'll be glad of an excuse to see the Emmy say what she was ordering."

"A hat," smiled Charman. She's not going to be outdone by Clara Darling."

"Do tell!" ejaculated Grandma. "Did she show you the picture, dearie? There were some awfully pretty hats on page fifteen. What color will it be? Green doesn't go well with most of Emmy's things."

Charman laughed. "It's possible, you know, to buy some other color, even by mail. I didn't see the picture, Grandma. It was Jim who went in, and Emmy asked his advice about it."

"Then he can show me which one."

It is when he brings the catalogue. Emmy's not liable to be extravagant, but it does seem risky getting a hat clear from Chicago. It might get mangled in the mail, and then where'd she be? Maybe that's Jimmy now. There's an auto stopping. If it's you, call him in, dearie, so he can show me—"

"That you, Jim?" called Charman, half rising as the front door opened. "Come in a moment. Grandma wants you."

Jim, who had eaten hastily and was on his way back to the bank, obeyed willingly enough. He had the bulky catalogue under his arm, and though he smiled at Grandma, his eyes shifted to Charman, as if to discover if she looked more cheerful than when he left her.

"You sit down," commanded Grandma. "I guess George K. can run the bank without you for ten minutes. Draw up a chair. I want you should show me the hat that Emmy Bascom's been fool for ordering without first seeing the quality."

"Good thunder!" objected Jim. "This book is three hundred and fifty pages thick! How'n I to find—" The book began on page fifteen. "The hats begin on page fifteen," broke in Grandma. "They look real pretty in the pictures; but I've never seen but one mail order hat, and except for making a good deal of commotion around town—" "Grandma," Charman interrupted

What About Your Dairy Palist

SMP Dairy Pails are made of special quality tin with bright polishes. There's weight to SMP Dairy Pails. . . . Strength to do years of good, honest work, 100% sanitary. . . . Easy to keep clean. Look for the SMP label of Quality, 90c. to \$2.85.

SMP DAIRY PAILS

sternly. "I've got a notion that Jim is sick and tired of hearing about that hat. Let him alone. He's got a right to admire a green hat if he wants to. The truth is, I liked it myself!"

"You did?" gasped Grandma, astonished; while Jimmy laughed, the first real laugh of the day—for him. For a moment his eyes met Charman's with their old twinkle, then returned to the book, and he said dubiously:

"It must be this one. I remember it kind of hung down one side, and had a red rose on the other."

"Read what it says, sonny. I haven't got my glasses."

Jim obeyed, reading with mock solemnity: "A dainty model with soft, girlish lines that you will simply adore. The trim is of two colors of dainty lace-patterned straw. Colors: black with a red rose; meadow pink with sand; gossamer blue with crab apple. Price only one-fifty-nine. Shipping weight two pounds." That sounds pretty swell, Grandma, doesn't it? Emmy was hovering between the black with the red rose, and the blue with the crab apple or carrots. I gave her a shove toward the blue, and ran, or she'd still be asking my assistance. Now I must skip, or George K. will think I've abandoned with his interest money."

Again his eyes sought Charman's, but at the mention of interest, her face hardened, and she turned away. A moment later the whirl of an engine told her that Jim had gone, and Grandma said, lifting her eyes from the gayly colored page: "Seems as if that hat would be a little while in the bin for Emmy; but you never can tell about a man until he's out of it. I think she's running a terrible risk, though they do say, 'money refunded if not satisfactory.' Still, they might make a fuss if she sent it back. Business men are hard-headed to deal with—that is, some of 'em are, though Father always said there were exceptions."

"I'd like to find one, then," said Charman; but Grandma, still absorbed in Emmy's purchases, didn't notice the sudden bitterness in the girl's voice.

CHAPTER XIV.

It was with a very genuine glow of happiness that Charman learned that the school board had given her "Distinction Four." Some years had passed since she graduated from the State Normal School—years when it seemed best for her to stay with Grandma; but as it became increasingly difficult to meet expenses and keep the house in repair, the girl realized that something must be done, and to get the school only a mile from her own door was a vast relief.

(To Be Continued.)

CRYING BABIES ARE SICKLY BABIES

The well child does not cry — it is only the sickly baby who cries. The well child is laughing and happy. Baby's cry of distress is his way of saying, "I am sick. I am not well. I am ill. Therefore, if your baby cries it is not in play in looking for the trouble."

Baby's Own Tablets are a safe and effective remedy for childhood ailments. They are a mild but thorough cleanser of the system, acting on the stomach and bowels, banishing the bad bacteria which build up colds and simple fevers and promote healthy sleep. They will make baby happy and keep him happy. They are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Prince Knows Empire Well

Completed Ninth Tour When He Returned From South Africa. On descending from the sky into Windsor Great Park, the Prince of Wales had completed the ninth of his foreign and Empire tours. In 1910, just after the war, he came to Canada and the United States. In 1920, he went to Australia; in 1921-22 to India and Japan; in 1925 to Canada again; in 1924 to the United States; in 1927 to Africa and South America; in 1928 to Canada; and in 1928-29 to Africa, the last trip being cut short by the King's illness and completed this year. In this last trip he has traversed Africa from Cape Town to Cairo. He is the most travelled of Princes, the most travelled of world citizens. He has seen more of the earth-grinding Empire, over which he will one day rule, than any of his future subjects. Which is as it should be, for under the British constitution the King and Emperor who is well informed regarding his wide-world domains is often able to offer wise advice to his ministers.

American household electrical refrigerators are becoming popular in Canada.

Mead's Cheeks Pulling Hair

Clover Leaf Rolls made with ROYAL YEAST CAKES are a Delightful Change

Try this recipe:

- 1 Royal Yeast Cake dissolved in one-half cup lukewarm water.
- 1 tablespoon sugar
- 1 cup flour
- 1 cup scalded milk
- 1 cup butter
- 1 teaspoon salt

Pour the scalded milk over the sugar, salt and butter. When cooled to lukewarm add the yeast. Let it stand for 10 minutes. Let it rise again until doubled in bulk, then cut down and knead slightly. Butter muffin tins and place three small balls of dough in each ring. Let it rise until double in bulk, brush over with melted butter and bake in hot oven.

Bread is one of the most nourishing of foods. It can be made more interesting, however, by occasionally varying the form of serving it.

If you bake at home, the Royal Yeast Cake Book will provide you with many practical tested recipes for all kinds of home-made breads. It will be mailed—free—on request.

Little Helps For This Week

"Behold I stand at the door and knock"—Revelations III. 20.

Open the door with shame if you have sinned.

If you be sorry, open it with sighs; Albeit the place be bare for poverty, And comfortable for lack of pity.

Be not ashamed for that, but open it, And take Him in that comes to sup with thee.

No power—not even that of God Himself—can open that door from the outside. Only the soul itself can open itself; but it, with perfect simplicity and unselfishness, any one of us is able to just put aside the bolt of his own selfishness and open his door and say, "Almighty God, be Thou my Guest; Father, I have sinned, forgive me." Then it is as if the sharper days of winter were melting into the approaching spring; and as if one of us came down some morning in his heated house, and should throw his door open to the gentle air, and there should flow in upon him the milder freshness and the purer fragrance of a renewing and reviving world.

—Francis G. Peabody.

United States laws may have teeth in them, but as a contemporary sees it the impression grows that they are false teeth—plates that can be taken out whenever wealthy folk are to be bitten.

Ever since the first United States census was taken, there have been more men than women in the United States.

A Brave Little Traveller Little Jean Baxter recently appeared on the White Star liner "Alberic," bound for Havana, with the following label attached to her coat: "My age is 3 years. My mother is dead, and I am going out to my daddy in Kingston, and travelling alone, so please be good to me."

"So Skinny Shamed In Bathing Suit, Gained 15 Lbs."

"Gained 15 lbs. taking Ironated Yeast. Was always ashamed to wear bathing suit but now I am plump and don't feel too skinny."—Eulah Langston.

Thousands write of 5 to 15 lbs. gained in 3 weeks with Ironated Yeast. Bony limbs round out. Ugly hollows fill in. Blended skin gets clear and rosy like magic. Nervousness, indigestion, constipation disappear overnight. Sound sleep. New health and pep from very first day.

Two great facts—no special weight-building. Pleasant and strengthening. Ironated Yeast little tablets. Far stronger than undiluted yeast. Results in 14 days.

So quit being ashamed of "skinny," yellow skin. Get Ironated Yeast. Continue taking it. Feel great tomorrow. Money back with quick results.

The upsets of Children

All children are subject to little upsets. They come at unexpected times. They seem twice as serious in the dead of night. But there's one form of comfort on which a mother can always rely; good old Castoria.

This pure vegetable preparation can't harm the tiniest infant. As it is, it soothes a restless, fretful baby like nothing else. Its quick relief soon sees the youngster comfortable once more, back to sleep. Even an attack of

colic, or diarrhea, yields to the soothing influence of Castoria.

Keep Castoria in mind, and keep a bottle in the house—always. Give a few drops to any child whose tongue is coated, or whose bowels are bound. Continue taking Castoria until the child is grown I. Every drugstore has Castoria; the genuine has the H. Fitcher's signature on the wrapper.

Wm. Connell, of Corner's
Corners, is on the sick list.

There will be no picture show
this week end.

School examinations com-
menced this week.

Mrs. E. S. Sexton, made a trip
to Calgary this week, and visit-
ed with her daughter.

John Barnes reported the
measurement of rain at his
farm on Saturday noon, as .35

R. L. Arthur, has secured a
position with the P. Barnes
Co. in one of their B.C. shops.

Gene Tarr, who had been
visiting with relatives at An-
boy, Sask., returned this week.

Sam Smithman reported
that there was 36 in of rain
fell at his farm during the
storms of last week.

Mrs. Alexander and family,
of Calgary, are visiting the
former's daughter and her hus-
band, Mr. and Mrs. Clarence
Hay.

Mrs. Z. Leach, of Josephine,
had the misfortune to fall and
suffer a broken leg on Tues-
day.

The regular Hospital Sewing
Meeting will be held at the
home of Mrs. A. K. McNeill, on
Tuesday, June 24.

Unusually high winds have
characterized the weather re-
cently. Last Friday and Sat-
urday a fairly continuous light
rain fell. It brought relief to a
situation which was rapidly be-
coming acute for the crops.

at Vancouver, B.C. His wife

pre-deceased him six months
ago. Citizens in general will
sympathize with Mrs. Connell
in her bereavement.

The Queen And Her
Relation To The Colony

As the queen is, so is the col-
ony is a slogan that should be
remembered by all beekeepers.
A good profile queen can build
up a good producing colony, but
an unprofitable one can never do
so. Furthermore queens reared
from stock that possess un-
desirable characteristics, such
as excessive swarming propen-
sities, irritability, etc., are very
very apt to transmit such char-
acteristics to their offspring,
queens or workers. The queen
is first responsible for the strength
of the colony, and colony
strength is an important factor
in honey gathering. The queen
is the only bee in the hive that
will deposit eggs that will pro-
duce worker bees, and experi-
mental work done by the Bee
Division at Ottawa has shown
that a good queen can produce
over 2,000 eggs per day when
at the peak of her production,
such queens can build a colony
up to full strength in a much
shorter time than can queens
that are less prolific. On the
average, young queens are cap-
able of greater egg production
than are old ones, moreover,
old queens are very apt to fail
at critical periods of the year.
Natural swarming is an un-

desirable feature of beekeeping
and all bees will swarm if the
conditions that excite this
instinct are favorable, but some
races or even strains of bees
will react to the exciting causes
much more readily than others,
and to constantly breed them is
to intensify the desire to
swarm, but on the other hand

constant selection and breeding
from colonies that show the
least tendency toward swarm-
ing will soon produce a strain
that will respond to very sim-
ple preventive manipulation.
The same holds true with bees
that show a tendency to be ir-
ritable, remove the queen and
replace her with one of a gent-
ler strain and the manipulation
of that colony will be much
more pleasant. The queen is

not the ruler of the colony but
the builder of it, therefore, se-
lect her with care—C. B. Good,
erham, Dom. Apiarist.

Visitor: "You have a fine
crop of tomatoes this summer.
What do you do with them
all?"

"We sell all we can and can
all we can't."
